Notes to Physician Treat symptomatically.

5. FIRE-FIGHTING MEASURES

Suitable Extinguishing Media

Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable Extinguishing Media Vapors/dust may form explosive mixture with air. During fire, gases hazardous to health may be formed.

Specific Hazards Arising from the Chemical

Vapors may form explosive mixtures with air. During fire, gases hazardous to health may be formed.

Protective equipment and precautions for firefighters

As in any fire, wear self-contained breathing apparatus pressure-demand (MSHA/NIOSH approved or equivalent) and full protective clothing must be worn in case of fire. In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk. Water spray to cool containers or protect personnel. Use with caution. Water runoff can cause environmental damage. Dike and collect water used to fight fire.

Specific methods

Use standard firefighting procedures and consider the hazards of other involved materials.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

Personal precautions Use personal protective equipment as required.

Methods and material for containment and cleaning up

Methods of Containment Prevent further leakage or spillage if safe to do so.

Methods of Clean-Up Keep in suitable, closed containers for disposal.

Precautions for safe handling

Advice on Safe Handling Avoid contact with eyes. Do not eat, drink or smoke when using this product.

Conditions for safe storage, including any incompatibilities

Storage Conditions Keep containers tightly closed in a dry, cool and well-ventilated place. Store away from incompatible materials. Protect from freezing. Keep out of reach of children

Incompatible materials Strong oxidizing agents.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Exposure Guidelines

No exposure limits noted for ingredient(s)

Chemical	ACGIH TLV-WA	OSHA	NIOSH
2-(2-butoxy)ethanol	TWA: 10 ppm	-	-

Biological limit values

ACGIH – Trade Secret – Value: 40 mg/l – Determinant: Acetone – Specimen: Urine – Sampling Time: See source document
 US-California OELs: Skin designation: Trade Secret (CAS Proprietary)-can be absorbed through the skin.
 US-ACGIH Threshold limit values: Skin designation: Trade Secret (CAS Proprietary)-can be absorbed through the skin.

Appropriate engineering controls

Engineering Controls Explosion-proof general and local exhaust ventilation. Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Individual protection measures, such as personal protective equipment

Eye/Face Protection Avoid contact with eyes.
Skin and Body Protection None required under normal use.
Respiratory Protection Ensure adequate ventilation, especially in confined areas.

General Hygiene Considerations When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.
